HEBER M. WELLS

SALT LAKE CITY, UTAH, USA

The Heber Wells building is a high-rise complex in Downtown Salt Lake City.

The building houses many prominent tenants including The Division of Occupational and Professional Licensing, Office of the Attorney General and the Consumer Protection Division.

Utah-Yamas Controls recently completed a large-scale fire alarm upgrade and addition to the Heber M. Wells Building.

The Heber Wells Building exceeds the height limits of standard firefighting equipment and is therefore considered a high-rise building.

Utah-Yamas Controls top notch team engineered and commissioned a complete audio evacuation system for the project.

The fire alarm system retrofit consisted of replacing the existing system from Simplex with an intelligent and addressable Fire Alarm System from Silent Knight.

The system has more than 450 devices, and includes audio evacuation and fire fighters telephones.

The existing fire alarm system was required to remain operational while the new system was installed and Utah-Yamas Controls accomplished the retrofit with no interruption to the building tenants.

In addition to the new fire alarm system, Utah-Yamas Controls has also installed a completely integrated HVAC Control, Access Control, Security, Energy Management, and Lighting Control System in the building.
