# **WEST JORDAN 3RD DISTRICT COURTS**

**WEST JORDAN, UTAH, USA**

**The new 3rd District Court building houses the Utah State, Juvenile and County Courts in a brand new state of the art facility located in West Jordan, Utah.**

Due to their variety of uses, Courthouses offer some of the most difficult and complex security problems to solve. Mixing public access areas with private, secured workspaces. Moving prisoners in and out of courtrooms while offering protection to judges and lawyers can be a perplexing and difficult challenge.

Utah-Yamas Controls stepped up to the challenge by providing a completely integrated control system that easily rivals some of the most sophisticated security systems on the planet.

The project includes an integrated PLC Locking Control System that utilizes custom graphics and touch screen computers.

The touch screens are seamlessly integrated with a state of the art digital closed circuit television system, a complete perimeter and interior intrusion detection system, a powerful access control system and an intelligent addressable fire alarm system.

An operator sitting in front of the touch screen computer can instantly respond to alarms anywhere in the facility.

The operator can control cameras, lock down the facility, respond to panic alarms and control prisoner movement simply by touching the screen.
